Message from the G Voice Mobile Team

Time is Money as we all know, and any businesses success is dependent on being competitive in price, every company seeks to cut its bottom line. We seek savings on everything we purchase and do, keeping our overheads down to a minimum.

The only way we can offer better deals on our own products and services and ensure future success for our business is by seeking savings on all our business processes, communication is vital for the sales and management of any business, G Voice Mobile offers savings on international business calls, our core proposition being; saving you money on all your international business calls without changing your dialing habits.

Our service reduces these costs, a 10 minute call from your mobile phone to a land line in Japan using 001 will cost you 200 baht, that same call using the G Voice Mobile service will cost just 31.50 Baht saving you 168.50 Baht.

G Voice Mobile will save you and your company money every time you make a call, and also save you money on those personal calls to family and friends, with G Voice Mobile you can make more calls, talk longer and save money while doing so.

How We Save You Money

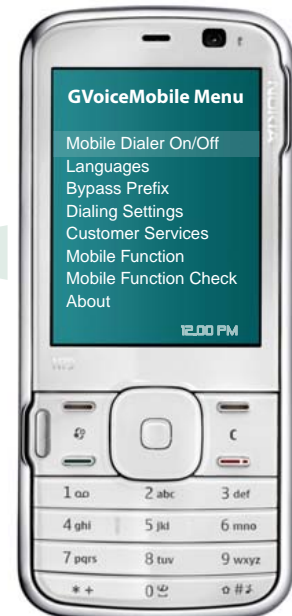

Our systems are set up to bypass the international call charges you would normally pay to use the Telecom Exchange Gateway, we don't have the huge overheads many major Telecom companies charge we are able to keep our running costs to a minimum, thus allowing us to pass these savings on to you.

We can reduce your international call charges by up a 92%, it's the overheads of running larger corporations which makes international calls so expensive. The G Voice Mobile system is highly efficient in its management and operation, and this efficiency allows us to keep our costs to a minimum.

G Voice Mobile Ease of Use

The G Voice Mobile System is very easy and convenient to use, there is no need to dial any special pin code or access code, just select a number from your phonebook or dial a number as normal press call and you'll be connected.

Our system comes with its own menu, this is preset for your convenience, it is there if you would wish to use it although we recommend to our customers not to be concerned with this menu at the present time, it has been incorporated in our dialer for future improvement to our system and services.

Questions & Answers

Q: How fast can my account be activated?

A: Accounts will be processed and ready on the same day

Q: Is your Dialer safe to use?

A: Our Dialer is a patented technology which complies with ISO-7819 standards, and does not emit any radiation or frequency causing no harm.

Q: When will I be billed?

A: All customers are billed on the 1st of every month

Q: What if I have a question?

A: Please call any of our agents to have all your question answered

The G Voice Mobile System

We install our dialer on your Sim Card for you, this is a very simple procedure which starts with testing your mobile phone for compatibility since mobile phones that are older than 10 years cannot use our system.

It takes just a few minutes to check your mobile phone and then for our the Sim Card dialer to be installed, this dialer can be easily removed and causes no harm to your Sim Card if you would wish to remove it for any reason.

Installing Our Dialer

We punch a hole in the Sim Card which causes no harm to your Card, this is simply to accept our Dialer and its Chip which is placed on the top of your Card. You can at any time remove our dialer very easily and return your Mobile back to using your Sim Cards as Normal.

Saving You Money on Business Calls

About G Voice Mobile

G Voice Mobile is a new generation of mobile phone service which allows you to make cheap international phone calls directly from your mobile phone, without you needing to change your dialing habits.

We provide you the service in making overseas calls from your mobile phone, at a far cheaper rate than many other call providers. After using G Voice Mobile you will notice significant savings on your monthly international telephone bills.

We offer the convenience of not needing to change your dialing habits, users can pick a destination number from their phonebook or just dial the international number on your mobile phone as normal. There is no need to dial any pin code or access code before calling, and we can install our Dialer on your Sim Card within Minutes and activate your account immediately. Your mobile phone will be ready for use as normal without any fuss or confusion, and starts saving you money every time you make a call.

How Do I Get Started

Using our service is as simple as:

1. Contact our agent and fill in our Sign Up Form
2. Allow our agent to install our Dialer on your SIM Card
3. Your account is immediately activated and you start using our Service

How To Use it

To start making cheap international calls, just make a phone call as usual like:

- Press the number and call directly on your phone
- Pick a number from the phonebook

Make sure the number you are calling has the format:

+ country code area code phone number

1. Press Call Button
2. Our system greets you with "Call Forwarding" and your call is connected within seconds

How To Bypass The G VOICE SERVICE

Press in the front of 001, 008, 009 or 00X as the following examples;

00181987654321 change to *00181987654321
Please note: **You cannot use** *+ 81987654321

How To Turn On/Off the G VOICE SERVICE when going overseas

Press then wait for a few seconds and the Gvoice Menu will appear.

Important: Please remember to turn on the G VOICE SERVICE when you return to Thailand.
